No English-to-Arabic GlossaryBy S. SchomburgThis book is alright, although there are typos throughout (missing dots on some letters, missing diacritical marks/too many diacritical marks on others, which makes it hard to read and understand when you're just starting out), including entire exercises in the back with errors/incorrect responses (which makes it difficult to impossible to check

your work). The biggest problem I have with this book, though, is that there is no English-into-Arabic section in the glossary (arranged in alphabetical order by first letter of the English word), only an Arabic-to-English glossary (arranged in what appears to be Arabic-alphabetical order). This means that in order to find a word, you have to pore through (potentially) the letter workbook AND all lessons in the textbook you've taken so far, in order to find a word you remember taking, but can't remember the word itself, which is horrible. Good language texts need both glossaries in order to be useful to students (don't know a word you're looking at in Arabic? check the Arabic-to-English glossary. Don't know how to say a word in Arabic? look it up in the English-to-Arabic glossary). 0 of 1 people found the following review helpful. Fast delivery By angelo fleeming Fast delivery. The second edition of this widely used text covers the first year of instruction in Modern Standard Arabic. It will teach students to read, speak, and write Arabic, while presenting an engaging story that involves Adnan, a Syrian student studying in the United States, and Michael, an American student studying in Cairo. In diaries, letters, and postcards, the two students describe their thoughts and activities, revealing how a non-American views American culture and how the Arabic culture is experienced by an American student. This new edition features online video, filmed in Syria; expanded communicative activities; an updated audio program; and material designed according to proficiency principles.
