**National Geographic Maps - Reference : Alaska [Laminated] (National Geographic Reference Map)** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Alaska [Laminated] (National Geographic Reference Map):

3 of 3 people found the following review helpful. Very nice map, but shipping may cause fold marks By RC Cola The map itself is quite excellent. I give it 4 stars instead of 5 because it has permanent folds due to it being rolled up for shipping. These folds detract from the readability and attractiveness of the map, in my opinion. Overall, it is very nice though. 0 of 0 people found the following review helpful. Nice map, poor shipping methods By Stephen K. Very nice map, but had several kink marks which I could not remove. 0 of 0 people found the following review helpful. but happy with the By Busybees 1 slight bend---light crease, but happy with the quality

One of the largest and most detailed maps available for the North Star State. Rich shaded relief makes Alaska's incredibly diverse terrain easy to visualize and remarkably beautiful. The map includes hundreds of named places including primary and secondary towns, political boundaries, infrastructure, hydrography, national parks, state parks, wilderness areas, major peaks, military reservations, and more. It shows Alaska in its entirety, including the entire 2,200 mile Aleutian Island chain that when mapping it in detail, cartographers almost always break it into sections for convenience. This map, however, portrays the entire State at the same scale on one wide sheet offering an unparalleled perspective on Alaska's true size. Also found on the map is an inset map which displays Alaska's relative size to the conterminous U.S. The map is encapsulated in heavy-duty 1.6 mil laminate which makes the paper much more durable and resistant to the swelling and shrinking caused by changes in humidity. Laminated maps can be framed without the need for glass, so the frames can be much lighter and less expensive. Map Scale = 1:3,660,000 Sheet Size = 40.5" x 30.25"

About the Author Founded in 1915 as the Cartographic Group, the first division of National Geographic, National

Geographic Maps has been responsible for illustrating the world around us through the art and science of mapmaking. Today, National Geographic Maps continues this mission by creating the world's best wall maps, recreation maps, atlases, and globes which inspire people to care about and explore their world.
