Geraldine Garner : Careers in Social and Rehabilitation Services before purchasing it in order to gage whether or not it would be worth my time, and all praised Careers in Social and Rehabilitation Services:

0 of 0 people found the following review helpful. Career Focus Exploring ResourceBy Julie1983PAPursuing a Social Work Degree and was interested in exploring potential career focus. Informative and fairly expensive, including appendixes of schools and regulatory bodies for respective fields in US, Canada and elsewhere including addresses and schools with SW Programs (that list left a bit to be desired, but that it was even included was a bonus).1 of 1 people found the following review helpful. great reference!By A. StarkeyThis little book has a world of valuable information for anyone considering a career in many of the fields of rehabilitation or social work.The book begins with a history of rehab, and explains to high school students what they should be doing in order to gain entrance into a rehabilitation program.I was impressed with the author, who mapped out too many careers to be mentioned. Each one explained what they do, where they can work, expected salary, how to qualify, how to advance, the bad points and a list for additional information.It is valuable information for writers, students, an anyone just curious.4 of 4 people

found the following review helpful. Careers in Social Rehabilitation ServicesBy R GardnerThis was a very useful new resource for the Career Academic Advising Center. We have approximately 240 students taking a College/University Career Explorations Classes each semester, as well as students from all over the Campus, who come in to use the Career Center. The resources in the Library here are very well used. This new and up to date career information is a valuable tool for students who are making decisions on a major, and looking for "that dream career".

This book provides cutting-edge advice for rewarding job searches. Both first-time job hunters and those looking to change careers will benefit from exploring the rewarding paths outlined in "Careers in Social and Rehabilitation Services". Detailed overviews of a range of professions and expert advice covering the entire job-search process show readers how to launch a successful career of their choice.

About the AuthorDr. Geraldine Garner is the president of Science and Technology Career Strategies. Previously, Garner was an associate professor and the associate dean of the Walter P. Murphy Cooperative Engineering Education Program at Northwestern University. She has taught career development at both Northwestern and Virginia Commonwealth University.
